

My name is Maria Nisu and I come from Finland. I am 21 years old and studying agriculture in Finnish college called Mustiala. Mustiala is the oldest and most respected agricultural schools in Finland.

I am interested of highland cattle. My main subject in school is cattle. Especially I like scenery in Scotland so that's why I am interested doing my practice there.

I'm looking for Scottish highland cattle farm, where I can make work among these "highlands". I m not expecting any salary but host family is needed where I can sleep and eat for free.

I speak good English like everyone in Finland because we have studied it since 3 rd grade. One reason to do practice abroad is to make my English better.

I was born in a poultry farm, so cows are not so familiar, but my interest is huge. I'm skilled driving ATV's, cars, tractors because we have them all at home. Of course I can do fieldwork like harrow and ploughing.

My practice would start in May and it would last 75, 8 hour workdays. So it would last at least 3 months.

I would be happy if you could search few different farms which are interested taking me as a trainee. I stay waiting your response.

Maria Nisu
